CHEMICAL ABSTRACTS

Vol. 33 December 10, 1939 No. 23

I. AUTHOR INDEX

("P" before a page number indicates "Patent")

Note.—In the transcription of names originally written in Russian the system followed so far as possible is that used in Webster's New International Dictionary (see opposite page which will be the back of the title page of this volume in bound sets), which corresponds closely with the system used by the Library of Congress. In this system *i* is used instead of the *w* or *ff* of other spellings *sh* instead of *sch*, *ch* instead of *tsch*, etc. Thus Pavlov, not Pawlow Chugaev, not Tschugaeff. To make quite sure, users of the index should in such a case look under both spellings.
